Title: CFR Paint Changes.

Bulletin No. 05-01

Date: December 16, 2005

The purpose of this CFR News Bulletin is to inform customers that Waukesha Engine will be changing colors of engine parts on Octane, Cetane and Supercharge units. In the past, new and rebuilt cylinders along with miscellaneous other small parts were painted gloss black. Effective October 1, 2005 all units, service parts and customer rebuilt cylinders will be painted the same color green. The color used currently is Topcoat PMS (Pantone Matching System) 342 Green. This is being done to increase the throughput of engines and parts to the end users. The parts being changed to green are as follows:

- Cylinder (new and customer rebuilds)
- Cylinder Head
- Clamping Sleeve
- Rocker Arm Assembly
- Motor Method Timer Control Arm Assembly
- Condenser Tower Assembly
- Condenser Pipe Assembly
- Mixture Heater Manifold
- Oil Filter Base
- Exhaust Surge Tank

If you would like more information please contact Waukesha Engine's CFR Department at (262)-549-2915 or your local authorized CFR distributor.
